

Product Description

GB-604W is a robust Wireless Glass Break Detector which has alarm, tamper and low battery signal outputs.

Setup Instructions
Test Mode:

Remove the insulation tabs from the battery holder, test mode is activated for 5 Minutes upon power on. LED blinks every second when detector is in test mode. Detector will exit test mode after 5 minutes.

Sensitivity (Range):

Table 1 below for detail sensitivity setting.

SENSITIVITY	DETECTION RANGE	SW1-1	SW1-2
MAX	6 M	OFF	OFF
MEDIUM	4M	OFF	ON
LOW	2.5M	ON	OFF
LOWEST	1.5M	ON	ON

(Table 1)

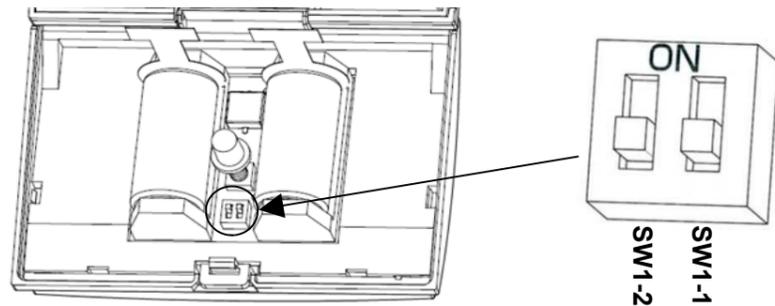

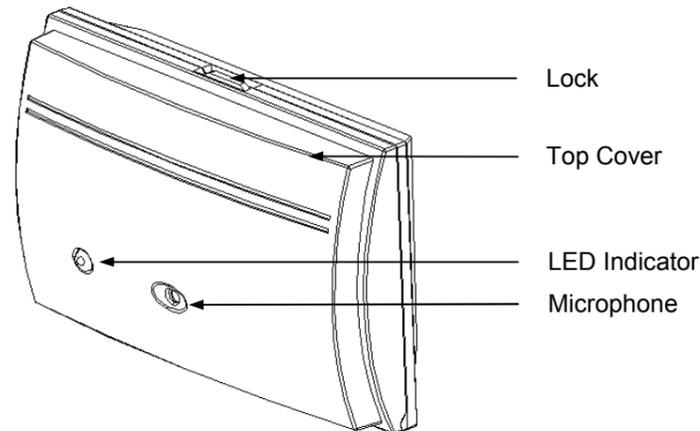

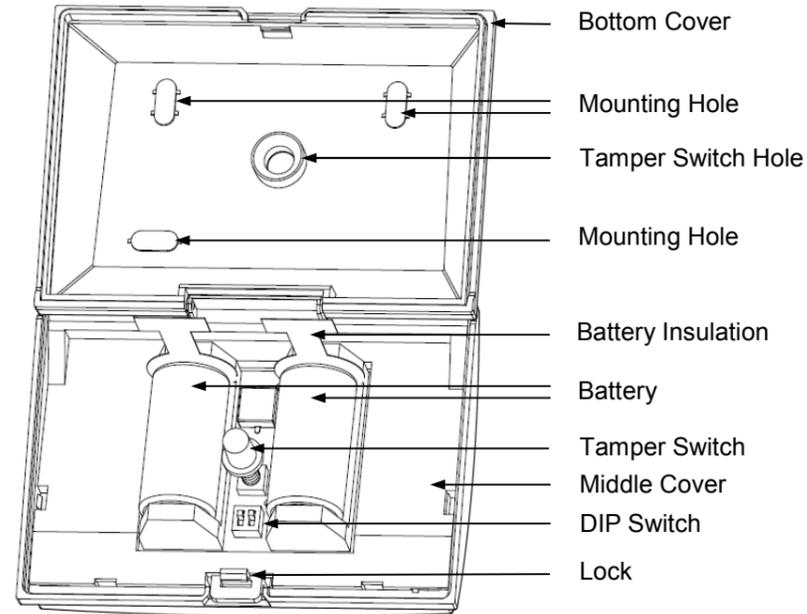

LED Indicators:

Table 2 below summarizes the LED messages.

CONDITION	RED LED
Power Up	Flash 3 times, flash once per second
Test Mode, event detected	Flash once per second (slow flashing)
Test Mode, alarm	Flash 2 seconds (quick flashing)
Working, Alarm	ON 5 seconds
Low Battery	Flash once every 30 seconds

(Table 2)

Glass Break Detector Internal Parts

Mounting Height

It is recommended that the unit be mounted at a height not less than 2 meters. (See fig. 1-6.)

When the unit is installed in vicinity with active ultrasonic sensors, the distance between units must be at least 1 meter. All areas of glass to be monitored shall be within a clear line of sight of the unit. Distance from the unit to the most remote point of monitored glass shall not exceed 6 meters.

Specifications

Power: Two 3V Battery (CR-123A)
 Detection Range: Maximum range is 6m, No minimum range.
 RF Frequency: 319.508MHz
 Operating Temperature: -10°C ~ 50°C
 Dimensions: 98.8x69.5x38.5mm

J3 Connector:

Pin1: GND
 Pin2: Alarm output
 Standby: low-level output, Active: High-level output for 5 seconds.
 Pin3: If battery voltage drops below 2.7V, LED will flash every 30 seconds.
 Pin4: 3V output when tamper is activated. 0V output when tamper is not activated.
 Pin5: Input 3VDC
 Pin6: NC
